Lab 2: Agile Backlog Creation & Sprint Simulation in Jira

NAME:SHASHWATH K R
SRN:PES2UG24CS463
SECTION:H

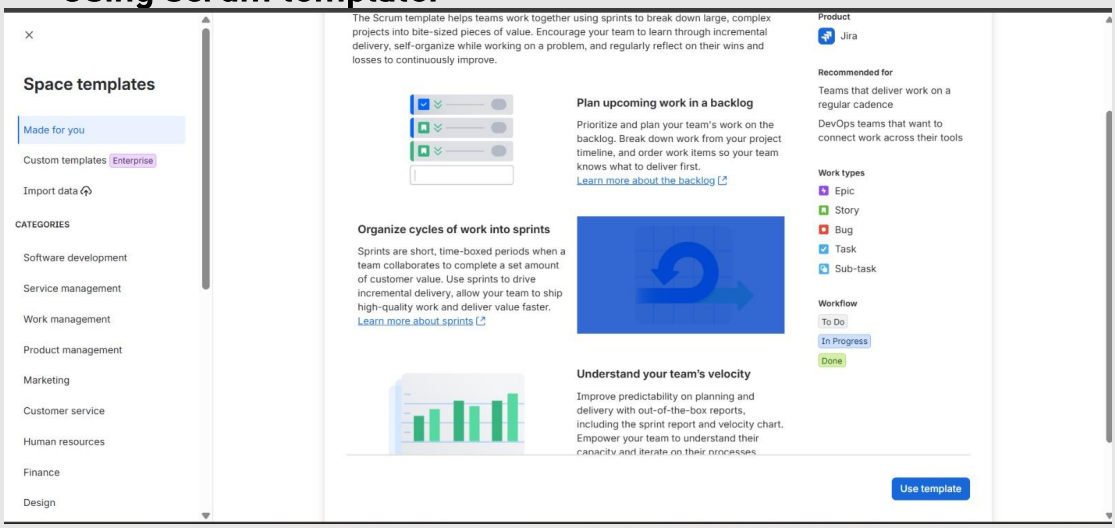

Screenshot 1:

- **This screenshot about selecting scrum templates to solve the problem**

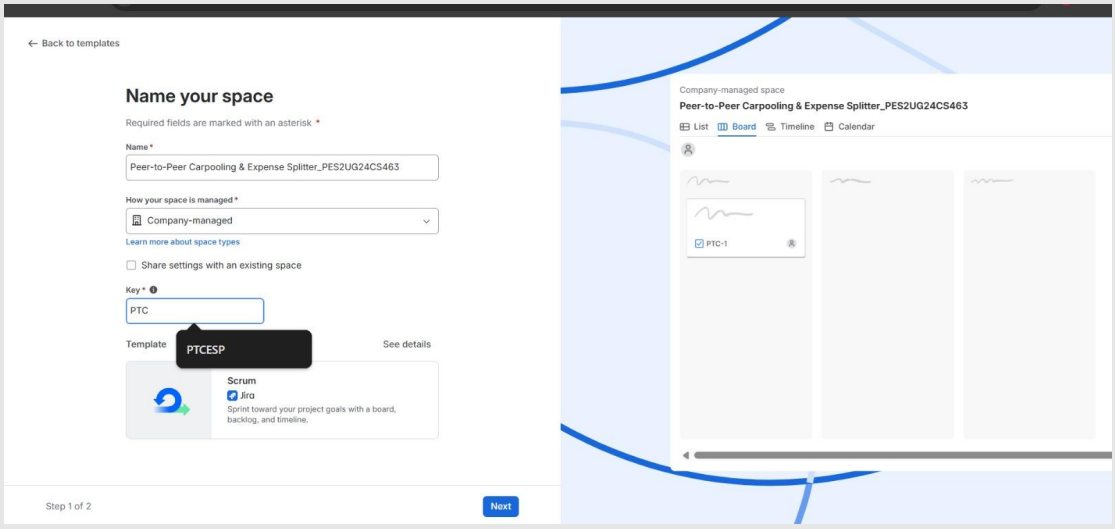

Screenshot2:

- **Using scrum template:**

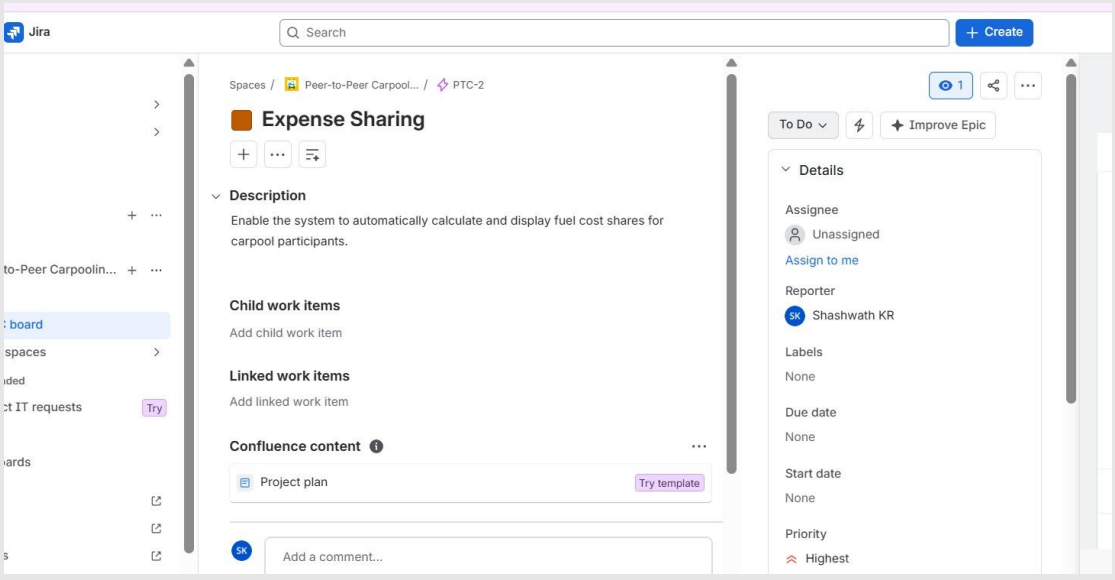

Screenshot 3:

- Naming the problem statement with my srn and selecting company-managed and saved

Screenshot 4:

- I am creating 2 epic cases :
  1. Ride Matching and Management
- Used to create and find the ride
  I ,MISSED RIDE MATCHING AND MANAGENT SCREENSHOT
  2. Expense sharing
- Used to share and calculate travel cost

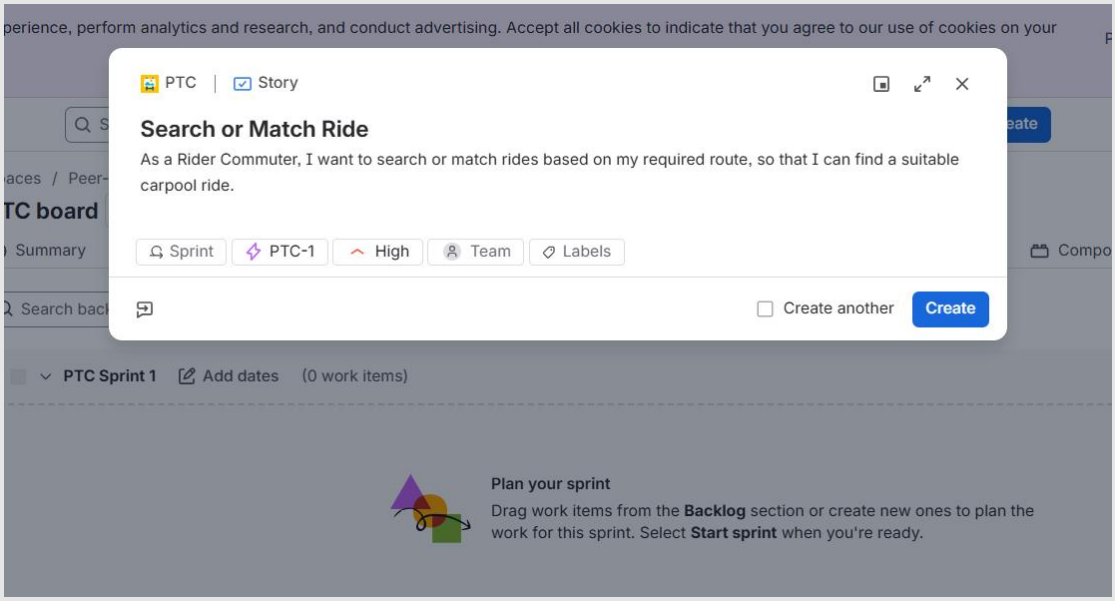

Screenshot 5:

- I am creating user story user story is nothing but small requirement written by user point of view

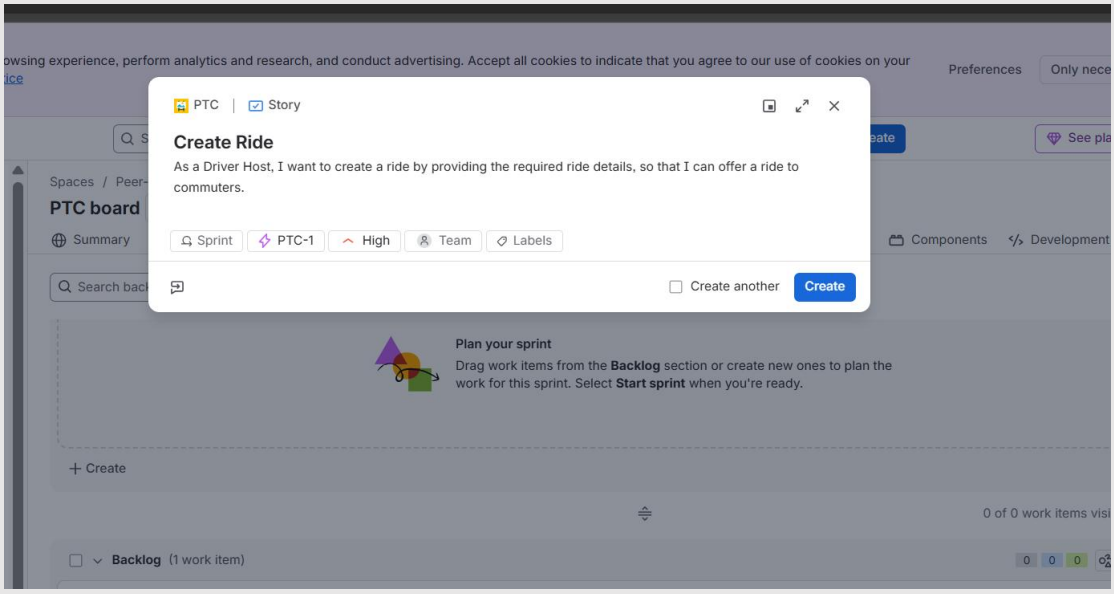

1. Search or Match Ride

- Rider can search for a suitable ride.
- The system matches the rider with a suitable route.

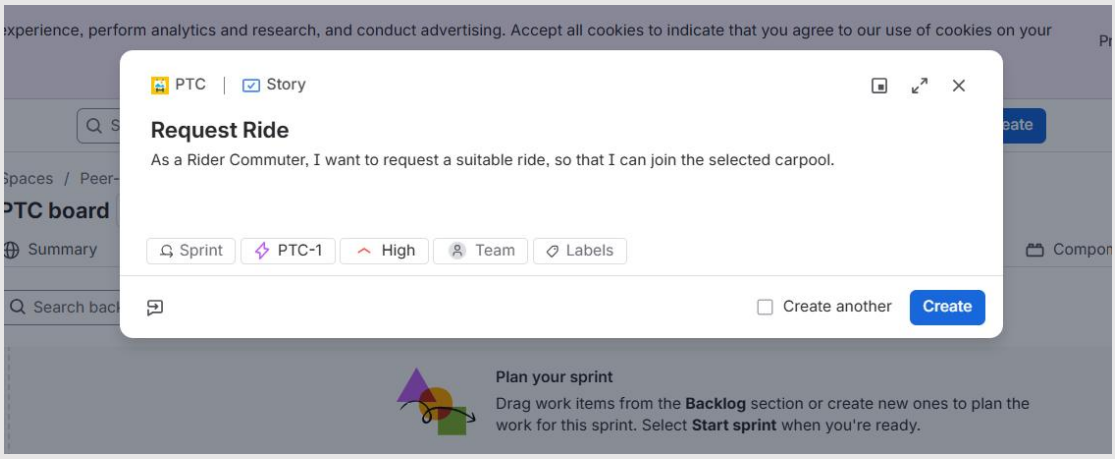

2. Create Ride

- Driver can create a new ride.
- Driver enters the ride details.

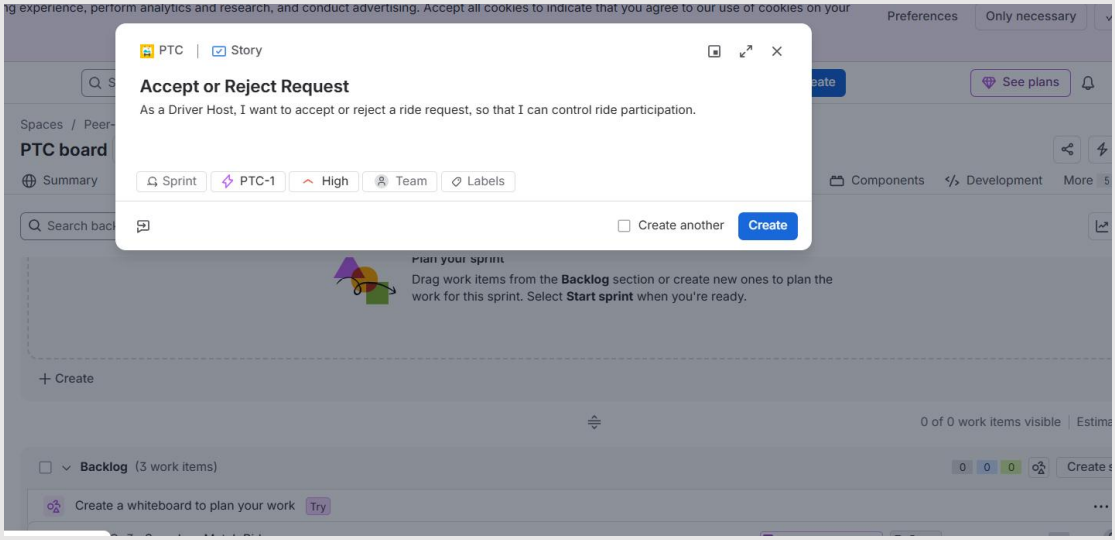

3. Request Ride(PTC-5):

- Rider can request to join a ride.
- The request is sent to the driver.

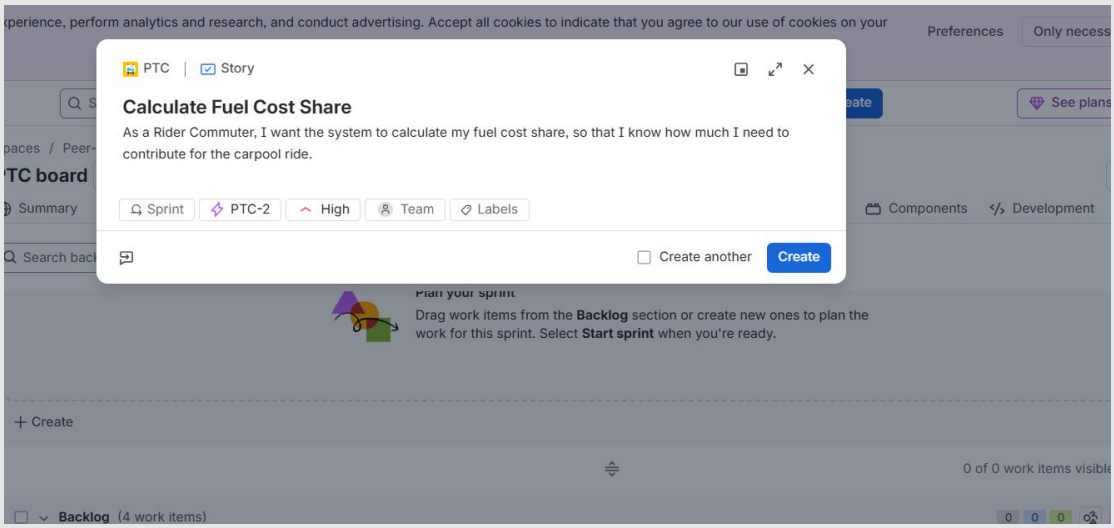

4. Accept or Reject Request(PTC-6):

- Driver can check the ride request.
- Driver can accept or reject the request.

- 

5. Calculate Fuel Cost Share(PTC-7):

- The system calculates the fuel cost.
- The cost is divided among the riders.

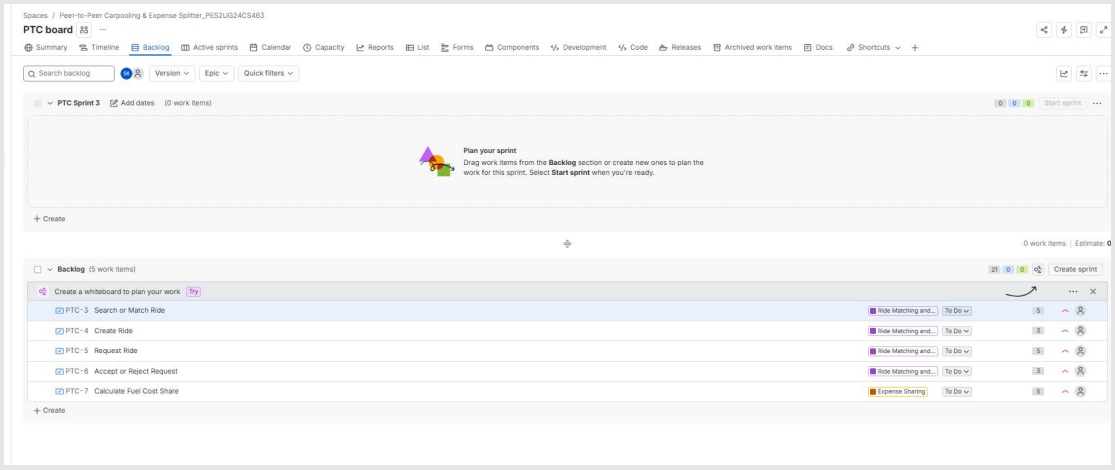

Screenshot 6 :

- Now my user story cases are ready I am assign the story points to the user story

Story point:

- **Story Points** show **how much effort a User Story needs to complete**.

User story	Story points
Search or Match Ride(PTC-3)	5
Create Ride(PTC-4)	3
Request Ride(PTC-5)	5
Accept or Reject Request(PTC-6)	3
Calculate Fuel Cost Share(PTC-7)	5

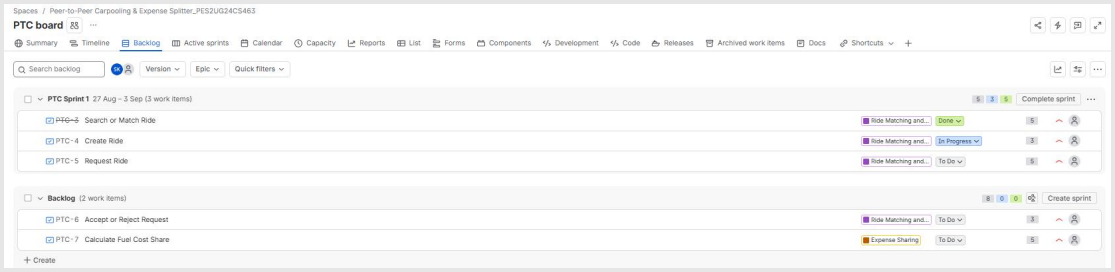

Screenshot 7:

Sprint:

- A Sprint is a fixed period in which we plan and complete selected user stories. We move the required stories from the backlog into the sprint and then work on them

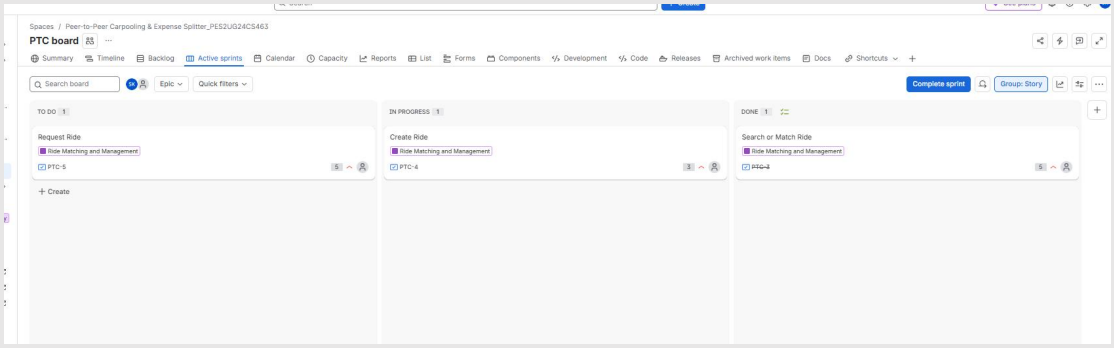

- Now my user story files in backlog drag and drop the PTC sprinter 1 after I moved 3 files now and will start the sprinter .

Screenshot 8:

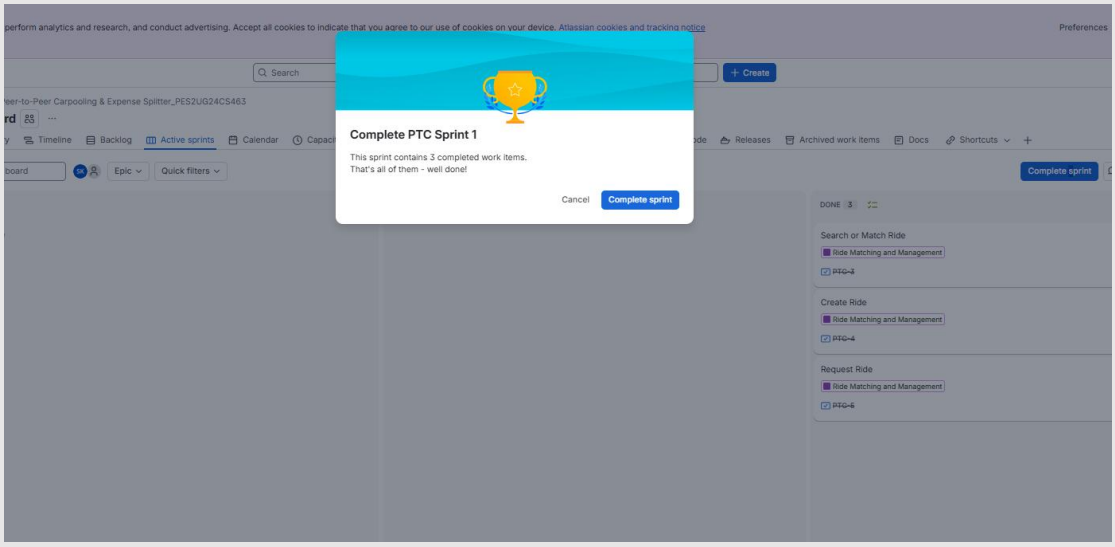

- Now my all use story files in To do mood drag to progress mood and wait minute and drop it done mode

- Do all this to all user story files

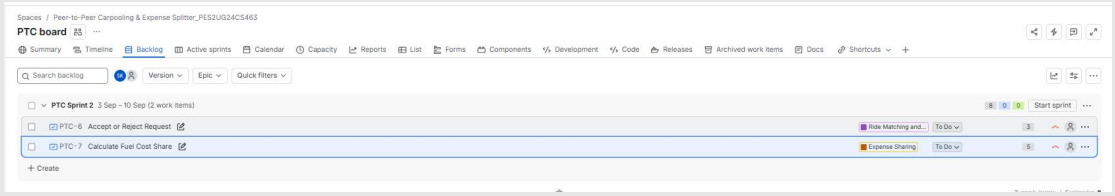

Screenshot 9:

- Now sprinter 1 completed successfully

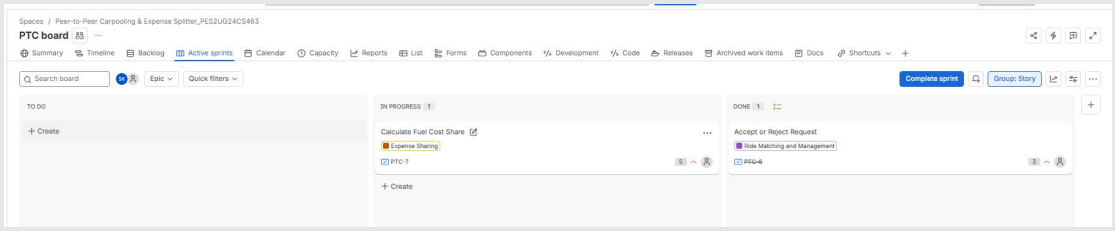

Screenshot 10:

- Now I moved remaing 2 user story files to PTC-sprinter

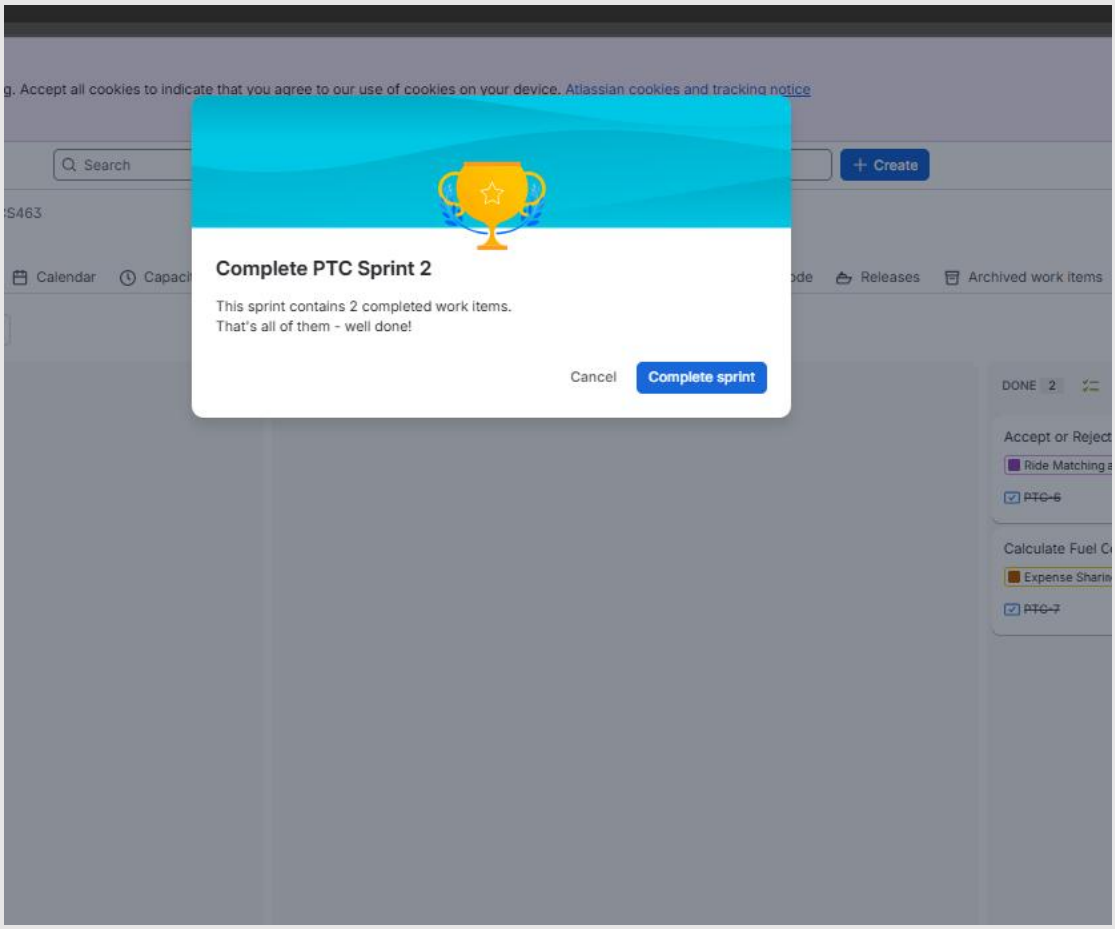

Screenshot 11:

- Now my all use story files in To do mood drag to progress mood and wait minute and drop it done mode
- Do all this to all user story files

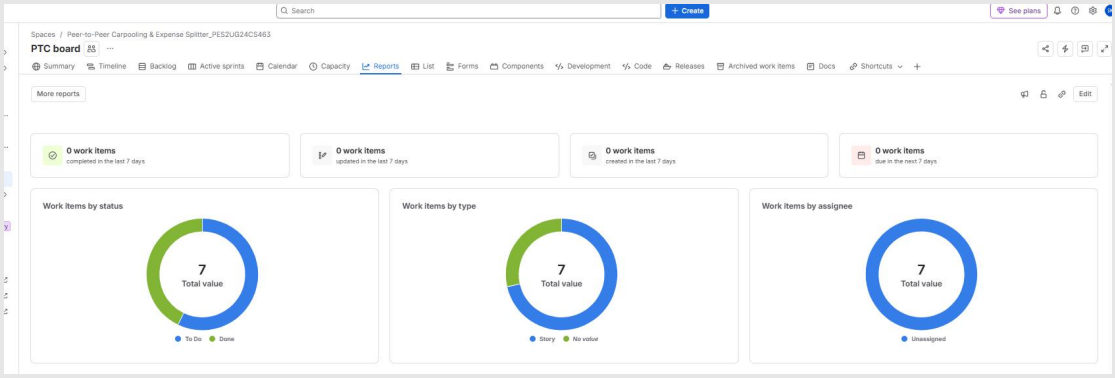

Screenshot 12:

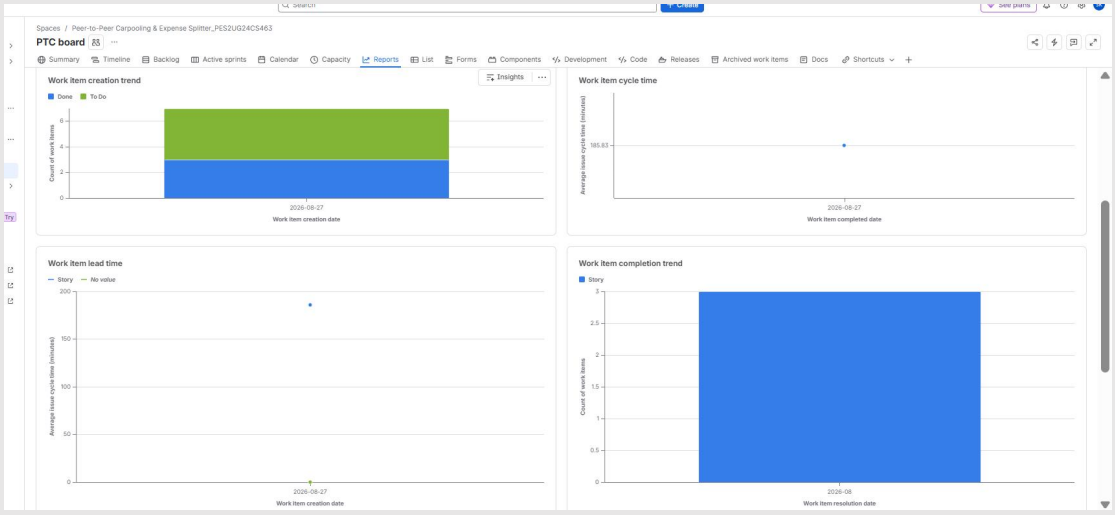

- sprinter 2 completed successfully

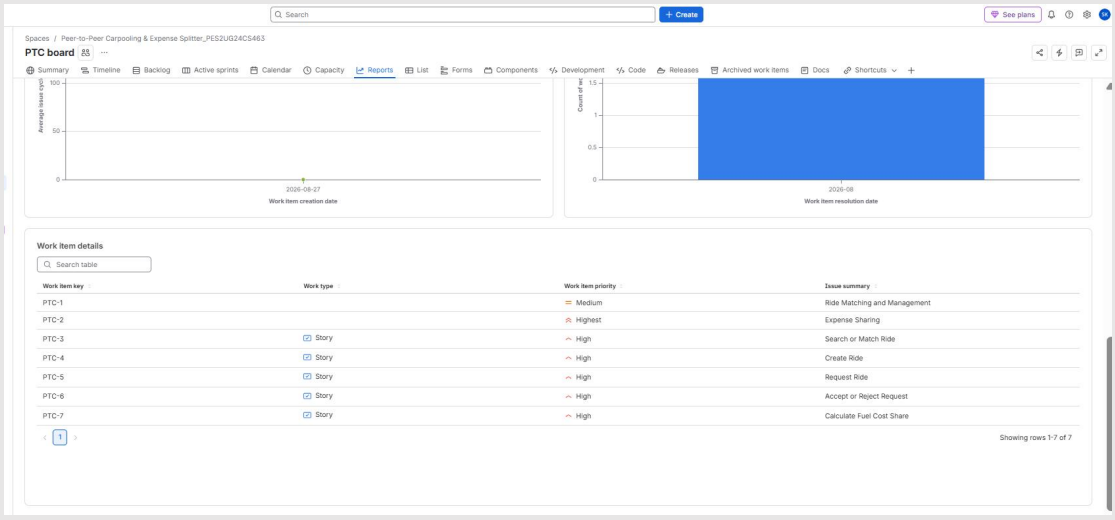

Screenshot 13:

- This report shows all the work items in my project. PTC-1 and PTC-2 are the Epics, while PTC-3 to PTC-7 are the User Stories under the project. It also shows their type and priority.

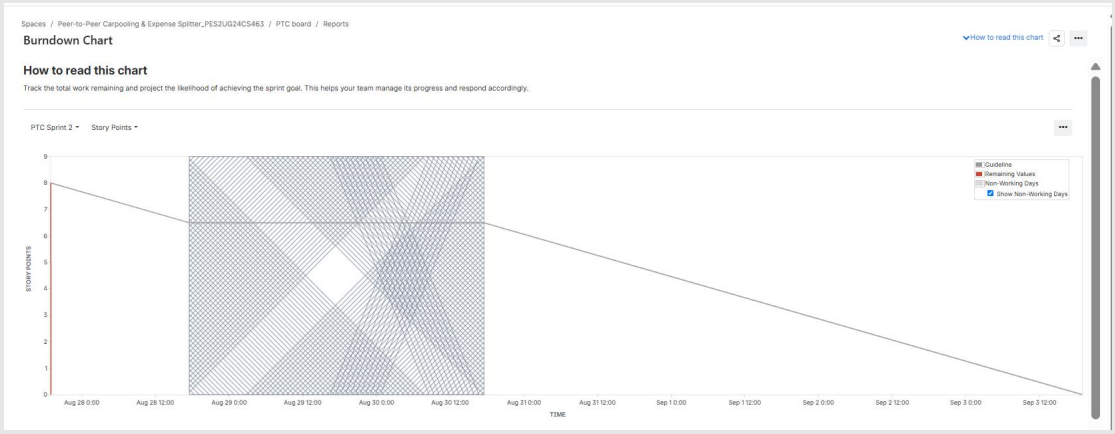

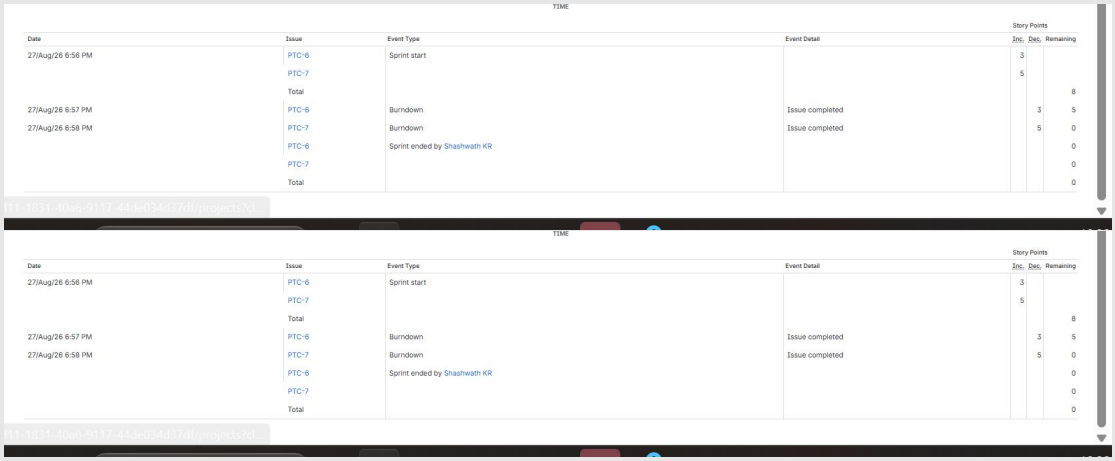

Screenshot 13:

- Burndown Chat:
- The Burndown Chart shows how much work is remaining in the sprint. As the team completes the user stories, the remaining work should decrease

- **Starting value:** The sprint starts with **8 story points** — PTC-6 has **3 points** and PTC-7 has **5 points**.
- **Graph line:** The line shows the **expected reduction of work** from 8 points toward 0.
- **Purpose:** It helps us check **how much work is remaining and whether the sprint is progressing as planned**.

TIME

Date	Issue	Event Type	Event Detail	Story Points Inc.	Dec.	Remaining
27/Aug/26 6:56 PM	PTC-6	Sprint start		3		
	PTC-7			5		
	Total					8
27/Aug/26 6:57 PM	PTC-6	Burndown	Issue completed		3	5
27/Aug/26 6:58 PM	PTC-7	Burndown	Issue completed		5	0
	PTC-6	Sprint ended by Shashwath KR				0
	PTC-7					0
	Total					0
